

Outdoor Learning Resource

Newsletter *March 2021 update*

March started with some fine spring weather. Although frosts still present, spring flowers are blooming and early Broad Beans and Potatoes are being planted.

Tree Council – Pictures evidencing pupils' involvement in tree planting activity will be sent to Council this month.

Gardening Now! – Frosts and low temperatures mean it is still too early to plant tender veg. so mulch bags remain in position at the start of March. The marquee has served its purpose and has been taken down to allow the lawn grass to recover and be re seeded.

Forest Now! - A lot of work has been done to mark trails, plant trees and hedging, remove scarecrows, features and piles of resources for future projects, at the request of CLT.

Long Garden Early Years – Pupils are benefitting from 2 x sessions per week, gaining confidence and developing skills, including improving language.

Altarnun and Egloskerry Primaries

Have now worked through their 'Explorer' themed Outdoor Learning project and the early/late March sunshine, really helped to enhance their enjoyment.
